CANADIAN ALBACORE ASSOCIATION

The purposes of the Association shall be as follows:

1. To provide a National authority to govern the affairs of the Albacore Class in Canada and to represent the owners of Albacores before local, national or international sailing authorities as may be necessary or desirable;
2. To maintain and enforce the Constitution, By-Laws and Class Rules in order to preserve the Albacore as a restricted One-Design Class of sailboat;
3. To encourage the building and adequate supply in Canada of quality Albacores at reasonable prices;
4. To sponsor and provide for regattas and competitive sailing of Albacores in Canada;
5. To bring together all sailors or other persons in Canada who may be interested in the Albacore Class;
6. To take any other actions as shall be in the best interest of the members of the Association and the Canadian owners of Albacores.

COMMODORE'S MESSAGE

As another season arrives, the Albacore Class maintains its vitality and its geographical extension. The Class now numbers approximately thirty-five hundred boats, not all of them, regrettably, members of our Association but all contributing to our eminent position as the largest dinghy class in Canada.

Growth of the Class has been rapid and there is a great deal to be thankful for in the development which has taken place over only a bare 13-year period.

It is unlikely that the same pace of actual numerical growth can be sustained. Perhaps, therefore, this might be the occasion to consider where the emphasis on development should lie in future. Above all I think we should concentrate our efforts in two main directions.

The first is to extend the Class beyond its still quite narrow geographical boundaries. This was mentioned in the message of my predecessor, Bob Goodings, last year and I am happy to report that considerable headway has been made. For example, the reorganization of a fleet in British Columbia has given us a solid foothold in that Province. Interest is spreading throughout Manitoba and in the Montreal area, as well as other parts of Quebec. But we are still concentrated too heavily in Ontario.

The second is to bring into the Association, Albacore owners who have not maintained their membership. We calculate that no fewer than two thousand boats fall into this category. Your Executive is addressing itself to this question and you can help by spreading the gospel. The higher the percentage of boat owners who are members of the Association, the more the Class can accomplish in developing activities and in preserving the Albacore's essential one-design characteristic.

The 1973 racing season offers several new "firsts". The North American Championships are to be held in Ottawa and, for the first time, will include a few Olympic helmsmen from other classes.

The Canadian Championships (which will continue to be confined to Albacore owners), always in the past held in Muskoka will this year be held in the Lake Simcoe/Couchiching area. We owe a debt of gratitude to our Muskokans - great supporters of the Class since the earliest days - for their contribution to the success of these Championships over so many years. But a variation was, at some point, inevitable.

The 1973 World Championships to be held in August at the Royal Plymouth Corinthian Yacht Club, promise to attract considerable attention in the yachting world. As this is written, a good contingent of Canadians, led by the present titleholder Jack Langmaid, has signed on for this regatta, the most important of the Class, where 150 boats will cross the starting line to compete for the Governor-General's trophy, presented in 1971 by the Governor-General of Canada.

On behalf of this year's Executive, I wish you a happy sailing season.

Anthony G. S. Griffin,
Commodore

A. G. S. GRIFFIN, Commodore — The C.A.A. Probably has no sailor with as much enthusiasm for Albacores as our Commodore. His frequent trips to Great Britain and The United States as well as his penchant for writing letters, has pulled the Albacore community together. Tony sails from the Balsam Lake Sailing Club.

R. A. GOODINGS, Past Commodore — Bob is known to most sailors as one of the C.A.A. stalwarts for the past several years. He is always there when needed for advice and many volunteer tasks. Bob sails from Toronto Sailing and Canoe Club.

CHRISTOPHER PATERSON, 1st Vice Commodore & Secretary Treasurer — Chris is still volunteering his professional skill in keeping our financial affairs in order, plus many other tasks as 1st Vice Commodore. Chris sails from the Balsam Lake Sailing Club.

IAN F. ROGERS, 2nd Vice Commodore — Ian has taken on the many tasks of the 1973 Albacore World Championship chairman for the C.A.A. Organizing the Canadian contestants attending the 2nd World Championship taking place in England, in August. Ian sails from Point au Baril Sailing Club.

R. HOWARD McRAE, Rear Commodore — Howard has contributed to the C.A.A. through his experience in working with junior sailors. Howard has chaired the last two Canadian Juniors held at Champlain Yacht Club, where he is a member and is the father of two top junior sailors.

FRED J. FRANCIS, Regatta Chairman — Fred is well known in the Muskoka area and owns no less than three Albacores which are sailed most successfully by the family at South Muskoka Sailing Club and other regattas. Fred is doing a first class job of organizing our 1973 Albacore Championships.

KENT D. TAYLOR, Specification Chairman — Kent is a staunch supporter of the C.A.A. and has taken on the large task of heading the specification committee. Ken and his wife, Diane are competitive Albacore sailors and sail from Toronto Sailing & Canoe Club.

PAUL MAGNINI & ROBERT RUDOLF, Fleet Liaison & Development Chairmen — Paul and Bob have taken on the tremendous job of fleet development and are working hard on improving and forming a closer relationship with the C.A.A. fleets across Canada. Paul is top Canadian champion for the 1972 Nationals and North American, and sails from Grimsby Sailing Club. Bob is an enthusiastic sailor and sails from Lake Joseph Sailing Club.

MARILYN HAMILTON, Publicity — Marilyn handles publicity for the C.A.A. championships and keeps the activities of the Association before the eyes of the news media and sailing publications. Marilyn and husband, Sicotte, who is chairman of the Ontario Sailing Association, sail from the Champlain Yacht Club, where they have done a great deal in promoting the Albacore class in the Lake Simcoe-Huron District.

OLIVE ERSKINE, Editor Year Book — Shackles & Cringles & Asst. Secretary-Treasurer — Olive is responsible for keeping us numbered, named and active. Olive and husband, Bob spend the summers at their Bala home on Lake Muskoka where Albacores are a familiar part of the scenery.

BRIEF HISTORY OF THE ALBACORE CLASS

The Albacore began in 1954 when various clubs around Portsmouth, England, principally the Stokes Bay Sailing Club, were looking for an ideal boat for local conditions in the Solent, which is known for its high winds and rough wave conditions. This dinghy was to be light and modern and yet suitable for sailing and racing by families.

Experiments were begun with Swordfish hulls a boat designed by Uffa Fox and produced by Fairey Marine Limited of England. Several prototypes were produced. Finally the Committee was satisfied with the hull form which was basically that of the Swordfish with a higher freeboard and changes in the after end to give more stability. Fairey Marine was then asked to build the new boat and thus the Albacore was born.

The class grew quite quickly in Great Britain where it is sailed by many clubs and including sailing associations of the armed forces. This led to Albacore fleets in such exotic places as Gibraltar and Singapore. The introduction of the Albacore to North America and Canada probably can be dated from 1958. It appears that simultaneously the Royal Canadian Yacht Club, urged on by Bill Gooderham, and Muskoka Lakes Sailing Club, arranged to import Albacores and brought in boats with English numbers. At the same time George O'Day was importing the boats into the United States and fleets were started at such places as Hyannis, Massachusetts and Reno, Nevada. Another early fleet started at Shadow Lake, Ontario, where Don Giffin built No. 652 from a kit and other leading helmsmen such as Jack Langmaid in No. 618 began sailing and racing in 1959.

In 1961 the production of the first fibreglass Albacores began in Canada, at that time the only fibreglass Albacore in the world. Growth was rapid and by 1963 there were over two hundred registered boats sailing in about eighteen clubs. In May of the same year the Albacore became a National Class in Great Britain.

Growth has been rapid in Canada ever since. There are now over thirty-five hundred Albacores registered in Canada. The principle strength of the class is in Ontario and there are fleets in Quebec, Manitoba, Saskatchewan, British Columbia, with individual boats scattered in the other provinces. The world-wide total of Albacores now exceeds six thousand, including close to 1,000 in the United States and 3,800 in Canada. There are five Albacore Builders in Canada and four in the United States.

A NATIONAL ALBACORE ASSOCIATION

Chairman K S Ayrton 14 Warwick Drive Hale Altrincham Cheshire Telephone 061-880 2289

Every season has it's highlight and without doubt the second Albacore World Championship at Plymouth is going to make 1973 a year to be remembered. The enthusiasm amongst Albacore sailors over here is tremendous and our maximum entry of 120 places was filled by early February only four weeks after the Entry Forms became available, and now there are a further forty helmsman on the waiting list! I am sure that International events of this kind do a great amount of good for the class and I would like, on behalf of all the Albacore sailors in Britain, to offer a warm welcome to the Canadian entry in advance.

Looking back over the last year the Albacore is really progressing well with over 70 new boats built since we confounded everyone over here by leaping to the 5100 series. We have also introduced a completely revised set of Rules involving Metric measurement which has been produced in the standard format approved by the I.Y.R.U. However we have ensured that the basic concept of the class has not been altered in any way. We are also in the process of authorising the production of cold moulded wooden shells as a cheaper alternative to hot moulding. In fact the Albacore is really alive over here as those of you who make the trip to Plymouth will be able to report at first hand later in the year.

In closing I would like to wish you all happy and successful season.

Good sailing in '73.

Ken Ayrton

21 BRITAIN ST., TORONTO 2, ONTARIO M5S 3S1

April, 1973

To the Members of the Canadian Albacore Association:

Our new stationery is just the first of many changes for 1973. At long last, we have editors for the Albacourier. Our Nationals begin to be rotated through our four districts. The By-Laws of the USAA will be undergoing major revision by the Executive Committee this year. The Regatta Committee is busily establishing standards for racing and trying to solve the question of eligibility. Our new emblem will be appearing in a variety of formats. And we hope to conclude the CAA-USAA work on specifications in time for Worlds.

We are hoping for a better break from the weatherman this year. Rain damped spirits at the Mid-Atlantics, washed out the first New York State Championship. Wind blew out part of the Mid-Winters and a day at our Nationals after avoiding the 70 boats assembled for the last two races at the North Americans.

Canadian participation at our events adds an extra dimension to our regattas. We hope our friends from Grimsby, Hamilton, Midland, Ottawa, and the Toronto area will be sailing with us again this season and we will be making new friends at the:

Mid-Atlantics Championships, Washington, D.C. - May 19-20.
New York State Championships, Keuka Lake, N.Y. - June 23-24.
U.S. National Championships, Monmouth Boat Club, Red Bank, N.J. - October 6-8.
Mid-Winter Championships '74, Tampa, Florida - March 21-23, 1974.

On behalf of our more than 300 members, I wish you good sailing in 1973.

DAVE

David L. Wallerstein
President

FLEET AND DISTRICT ORGANIZATION

The basic organization within the Canadian Albacore Association is the fleet. A fleet consists of three or more boats sailing together in the same area.

The fleet applies for C.A.A. recognition by advising the Association of:

- a) Title and location.
- b) List of members
- c) Names and addresses of elected fleet captain and secretary.

Fleets are formed to promote local racing of Albacores and to encourage the measurement and buoyancy testing of boats to C.A.A. rules and specifications.

Because of the large number of fleets, they are grouped into districts.

District fleet captains, secretaries and measurers are elected by fleet executives to represent all fleets within a geographical area. Districts are largely self governing. Their main tasks are to provide communication between fleets and the C.A.A. executive; promote district championships and encourage the development of new fleets.

The administration of a class as large as the Albacore requires a great deal of volunteer work by people who like to also enjoy their sailing. The fleet and district organization is designed to spread this work as evenly as possible.

MEASURER'S REMARKS

CERTIFICATE OF MEASURER

I confirm that the within described Albacore, its sails and gear conform to the CAA By-Law governing class rules and specifications and to the spirit of the class, and that this form has been faithfully completed in accordance therewith.

.....
Class Measurer Place Date

.....
Measurer's Address

Measurer to return the completed duplicate forms to the Chief Measurer, with applicant's cheque for \$5.00 payable to CAA.

A certificate and duplicate form will be mailed to the owner which will require an annual buoyancy test and record of approved sails to remain valid.

The last years racing and sailing season have proven to the Association the need and wisdom of the buoyancy rules and testing. The Chief Measurer, Fraser Dewar, has instructed the designated testers and measurers on the procedures and needs of the buoyancy tests for the hull and mast. The current instructions are included in this publication to assist all sailors, racers and day sailors in appreciating the tests and in preparing themselves for the official test and in proceeding with all unofficial tests. Do not assume your boat is all right even though it is new. A test is the only sure way.

The rules for the Association are also included, for easy reference for all owners.

The need for measuring of all boats, new and old, is sometimes a confusing issue to boatowners who are only casually interested in racing, or those who just "sail for fun".

Before a boat can be entered into a regatta requiring a measurement certificate the owner must hunt up a Measurer. The owner is then in a flap - Why is it necessary?
 - Who can I get?
 - What do I have to do?
 - What does it cost?

The answers to these questions are relatively simple:

Why is it necessary? - Not all boats measure in. Reinforced Fibre glass boats on the whole do measure in, but sometimes due to a problem in assembly the length, depth and sometimes beam width are not right. Further, an owner can put on devices and arrangements that are contrary to the rules. Buoyancy problems and mast position settings often are cause for rejection. Our advice is to have it measured before your year's guarantee is over. The builders are glad to help, but cannot be expected to be responsible forever.

Who can I get? - The Chief Measurer, Fraser Dewar, and the Specifications Committee have appointed many individuals who have agreed to act as measurers. They do the job for \$4.00; but you can be assured they do not reap profits. They do it largely to help fellow sailors, and hope to break even on gas expenses. The measurers and their addresses are listed below. Do not wait till the last moment, for it takes two hours or so to measure a boat and he has only so much spare time, as we all do. The two weeks before the Annual Canadians are the darkest and worst for a good measurer, and the Chief Measurer.

What do I have to do? - Make a telephone call for an appointment with your nearest willing measurer. Test your buoyancy unofficially, as suggested in the section on Chief Measurer's Instructions on Hull and Mast Buoyancy Tests. If you fail this, get busy and fix it so your friend is not required to make another trip. Put on the black bands on the mast and boom. The rules are complicated, but if you persevere you can do it. Have the top band as high as you can, but within the rules. The boom band is easiest, with the measurement taken just inside the bolt rope track in the mast.

What does it cost? - The charge is \$5.00 (should be more to be realistic) and the cheque is to be made out to the Canadian Albacore Association. The Measurer sets \$4.00 back. The form and money are sent in, and you will have a certificate mailed to you. Remember to get a copy of the measurements, for your information, as well as to be sure all sections in the form are filled in and signed.

Remember, the Association is run by volunteers, donating their time for fun and for the advancement of sailing of all kinds. Be patient, and be willing to help as called upon.

Above all, be safe and be observant of all the rules of safety. A fibreglass hull with insufficient buoyancy is like an anchor and will sink if capsized.

SAFETY RULES

1. Add buoyancy in the bow and have your buoyancy test each season.
2. Carry 2 large plastic pails clipped or tied to the boat.
3. Be in good physical condition to avoid rescue fatigue.
4. Climb to the high side quickly and put a foot on the centerboard.
5. Be sure the mast is sealed completely or foam filled above the spreaders.
6. Wear woollens, storm wear and a life jacket in cool conditions.
7. Carry a 5 lb. anchor and 100 ft. of 3/16 nylon line to prevent drifting into rocks.
8. Prevent mast going right down if possible.
9. Use shack cord or a jam cleated line to prevent the board from dropping into the trunk if upside down.
10. Fasten loose gear and be prepared to drop sails quickly.
11. Use a pair of leather faced gloves with the fingers cut off to prevent slipping off the board or boat and to hold sheets easier.
12. Brief your passengers and crew on what to do in case of capsize and always insist on children wearing lifejackets.
13. If you must wait for help, tie a jib sheet across the hull to the opposite fairlead to hold on to.

THE RULES OF THE CANADIAN ALBACORE CLASS (being By-law No. 7 of the By-laws of the Canadian Albacore Association) (Authoritative from 1st Jan. 1973)

1. OBJECTS OF THE CLASS

The object of this Restricted Class is to provide a family racing and sailing boat which can lie afloat but is light enough to haul out daily and easy to transport on a trailer.

To achieve these objectives the following rules have been drawn up. Should a measurer consider that there has been any intentional distortion of hull shape, even if not contravening the prescribed measurements, or any other attempt to depart from the spirit of these rules, he shall report the matter in writing to the Canadian Albacore Association.

2. SPIRIT OF THE RULES

Any changes made to the hull, sails, standing and running rigging not on the boat when the measurement certificate was issued and is not expressly permitted by the rules shall be brought to the attention of the Specifications Committee and/or the Chief Measurer in writing for a ruling to ensure that such changes are within the Spirit of the rules. The onus of establishing that the change is expressly permitted by the rules is on the owner.

Changes made without a ruling shall be made at the owner's risk and shall not obligate the Specifications Committee and Chief Measurer to accept such changes.

Measurers shall report such matters to the Specifications Committee.

Any boat having features, not expressly covered by the specific rules of the Class, that are not consistent with the spirit of the rules as interpreted by the Executive Committee or the Specifications Committee shall not be approved and cannot race even though there is no specific restriction preventing the item in question. Such boat is liable to have its measurement certificate revoked until the violation of the rules is rectified.

3. HULL SHAPE AND HULL DIMENSIONS

The completed hull shell shall be of uniform thickness throughout except where it fits with other members or where stiffness is required; fibreglass hulls, minimum thickness 1/8 inch and moulded plywood hulls between 1/4 and 3/8 inch and shall only be built by Canadian Albacore Association approved builders on Canadian Albacore Association certified moulds and those approved by other National Albacore Associations adhering to rules acceptable to the Canadian Association.

The shape of the hull is to be maintained as a strict one-design and no changes will be permitted whether or not the change affects one of the measured parts of the rule on hull measurement.

- 3.1 Length overall of the hull, including stem band, but excluding normal rudder fittings measured from the outside of the transom to a point where the line of the deck meets the line of the stem, shall not exceed 15 feet 1/2 inch and shall not be less than 14 feet 11-1/2 inches.
- 3.2 Beam shall be measured to the outside of the skin, excluding any deck overhang.
 - 3.2.1 At widest section it shall not be less than 5 feet 7/8 inch nor more than 5 feet 1-7/8 inches.
 - 3.2.2 At mid-length 9 inches above the bottom of the keel band it shall not be less than 4 feet 6-1/2 inches.
- 3.3
 - 3.3.1 Depth at mid-length measured vertically from the sheer line to the inside of the skin 6 inches from the fore and aft centre line of the boat shall not be less than 1 foot 10-1/2 inches or more than 2 feet. Sheer line shall be taken as the top of the deck immediately above the hull skin or the gunwale at the side.
 - 3.3.2 The stem height from the top of the deck at the centre line to the line of keel produced shall not be less than 2 feet 2 inches or exceed 2 feet 4-1/2 inches.
 - 3.3.3 The depth of the transom vertically from the sheer line to the outer surface of the keel shall be not less than 1'

1-3/4". The thickness of the transom shall not be less than 3/4 inches, provided that the thickness may be less in fiberglass boats in suitable strengthening is provided including re-inforcement for all fittings attached to the transom. The transom shall conform to the class drawing with profile tolerance of 1/4 inch measured at right angles to the hull skin.

- 3.4 All boats shall be fully decked from the stem for a maximum length of 4 feet 9-1/4 inches and a minimum length of 4 feet 1-3/4 inches. The after edge of the foredeck shall not be forward of a line drawn from the forward edge of the mast to the most forward permitted shroud position at deck on each side. (See Class Rule 3). Side decks extending not more than 6-1/2 inches or less than 3 inches from the inside of the skin, shall be fitted between the foredeck and the transom, or until the after deck, if any, is reached. An after deck is optional. If fitted it shall not extend more than 3 feet forward of the outside of the transom. Deck overhang is optional maximum 3 inches beyond the outside of the skin including the rubbing strake at any point. No boat may be built or modified after the 1st of May 1963, so that at any point inside the skin the level of the side decks is below the sheer line.
- 3.5 In relation to boats built or modified after the 1st of May 1963, side benches shall be fitted on each side at thwart level (taken as highest point of the centreboard case) or below and shall extend forward at least as far as the shrouds from a point not more than 3 feet from the outside of the transom. They shall be of a width not less than 1 foot and not more than 1 foot 2 inches within these measurements.
- 3.6 The essential measurements of the centreboard case are indicated on the Measurement Diagram. The sides of the centreboard case shall not exceed 7/8 inches in thickness. The centreboard slot in the keel and hog shall be between 1/2 inch and 1-3/16 inches in width. The forward end of the slot shall not be more than 8 ft. 9 ins. from the lowest point on the outside of the transom and the after end of the slot shall be not less than 3 ft. 9 ins. from that point.
- 3.7 The position of the centre of the centreboard bolt forward of the outside of the transom shall not be more than 8 feet 5-3/8 inches or less than 8 feet 2-3/4 inches. Only one centreboard bolt hole shall be allowed on each boat.
- 3.8 A false keel which should be bevelled to fair into the keel band, shall be on the outside of the shell so that there is a minimum of 1/2 inch and a maximum of 3/4 inches clear of the skin at the center extending from the fore foot to the transom. The width at any point shall not exceed 3-3/4 inches. The width at any point within 9 feet 4 inches of the after edge of transom shall not be less than 3 inches.
- 3.9 As from 1st April 1965 one bilge keel of length 4' 1-1/2" in length (excluding fairing) shall be fitted on each side of the boat showing at least 1/2 inch clear at the center to the full length. Bilge keels may be faired to the hull. The faired section at each end of the bilge shall not exceed 6 inches in length. The total width of the bilge keel (including fairing) shall not be less than 2 inches nor more than 2-1/2 inches. All four edge fairings shall be similar. All four end fairings shall be similar. The bilge keels shall be fitted so that the weight of the boat shall bear on the main and only one bilge keel when the boat is placed on a level surface.
- 3.10 Sheer shall be a fair continuous concave curve.
- 3.11 Tumble home of the topside shall not exceed 1 inch on each side.
- 3.12 Transom scuppers not exceeding a total area of 100 square inches are allowed and/or two suction bailers not exceeding an effective cross sectional area of 2 square inches each (i.e. area of the smallest hole or holes through which all the extracted water

passes). Neither draining port shall be within 1-1/2" of the top of the transom or tiller port, or of the other draining port. The scuppers shall be fitted with closing devices which may be transparent and which shall never interfere with the action of the rudder; never act as an extension of the hull skin and be capable of being reclosed while sailing. The transom shall be adequately strengthened to withstand the forces applied to it while sailing. Other apparatus to make the boat self draining is not allowed.

- 3.13 The hull being one design, transparent hull panels are not permitted.
- 3.14 A tiller port not exceeding 9 inches in width by 4 inches in height is optional.
- 3.15 After January, 1973, protruding sections ahead of the stem such as bow eyes or other projections will not be allowed to be used while the boat is sailing.

4. WEIGHT AND WEIGHING

- 4.1 All boats shall be weighed in a dry condition. Built in buoyancy apparatus air bags or other material to provide buoyancy of at least 600 lbs. shall be included in the weight of the boat. Buoyancy apparatus originally weighed with the boat shall not be removed or replaced unless the certified weight of the boat is checked by the measurer.
- 4.2 New plywood boats shall be weighed before they are put into water for the first time or otherwise wetted.
- 4.3 The dry weight of the completed hull, including the keel band and essential fixed metal work but stripped of all gear, including mast, boom, centreboard, detachable floor boards, pump (if any), all loose gear and rigging, shall not be less than 240 lbs.
- 4.4 If a boat is found to weigh less than the required weight owing to an error in building, permanent wooden or metal correcting pieces not exceeding 20 lbs. shall be fixed to the underside of the centre thwart and shall not be removed throughout the life of the boat.

5. CENTREBOARD

- 5.1 The centreboard shall not exceed 80 lbs. in weight.
- 5.2 When housed the centreboard shall extend neither above the sheer line nor below the keel. Only one pattern of centreboard is allowed of minimum width 11-3/8 inches measured at right angles to the leading edge at a point on the leading edge 2 feet 6 inches from the bolt hole, and of a maximum dimension of 4 feet 2 inches from bolt hole to tip.
- 5.3 If of streamlined section, the centreboard shall be all wood apart from the usual protective edges and stiffening.
- 5.4 If of metal, the centreboard shall be of normal commercial flat sheet steel or aluminum not less than 1/4 inches in thickness. Any fairing shall not extend more than 1 inch from the edges.
- 5.5 Devices to change the pitch, twist or angle of the centreboard either automatically or manually are prohibited. Friction devices to hold the board in position only are allowed. The centreboard above the water line shall be flat with parallel sides.
- 5.6 Trim tabs, hinges or other devices on the centreboard are prohibited. The board shall rotate on a fixed centreboard pin.
- 5.7 Only one centreboard shall be used at any one regatta subject to replacement if damaged.

6. RUDDER

Either lifting or fixed rudders are allowed. The arrangement is optional. The blade must conform to the class drawing or pattern. The angle between the stock and the blade is optional.

7. SPARS AND STANDING RIGGING

The rig shall be single masted sloop rig with an alternative smaller rig.

7.1 General -

The type, section and weight of the mast and the boom are optional subject to rules 7.3 and 7.4 provided that:

- 7.1.1 The unriggered spars shall each pass through a circle of 4 inches diameter.
- 7.1.2 A maximum of one crosstree and/or one pair of jumper struts are used to stiffen the mast.
- 7.1.3 The jib stick or whisker pole for the foresail shall not be more than 6 feet overall.
- 7.1.4 The aft side of mast at deck level to the upper after edge of transom shall not be less than 10 feet 4-1/2 inches or more than 10 feet 5-3/4 inches.
- 7.1.5 The mast shall be sealed to keep out water or filled for at least the top 14 feet with closed cell expanded foam or foam pellets.
- 7.2 The distance of the shrouds at deck forward of the afterface of the transom shall not exceed 9 feet 1-1/2 inches.
- 7.3 **Mast**
 - 7.3.1 Masts may be of wood and/or metal. Metal masts shall be constructed of standard grade marine aluminum alloy. No special light-weight alloy may be used without the written approval of the Specifications Committee. Aluminum masts shall be constructed from a section with a minimum weight of 0.59 lbs. per lineal foot and a minimum wall thickness of 0.06". Tapering is allowed above the forestay attachment. The mast surfaces shall be relatively smooth with no shapes designed to change and improve its windage characteristics.
 - 7.3.2 Only jumper struts and the crosstree will be allowed as in Rule 7.1. These may not be adjusted while underway.
 - 7.3.3 Masts may only be rotated by the boom when securely attached to the mast in the horizontal plane to prevent over rotation, beyond the normal boom swing. No other form of rotating devices are allowed.
 - 7.3.4 The mast shall be restricted in its movement at the deck level within the limits given in Article 7.1.4 by permanent stops fitted to the deck. These may consist of a mast gate at the rear and blocking at the front. This new ruling shall apply to all boats after January 1st, 1970.
 - 7.3.5 Mechanisms to alter mast position at the base while underway are prohibited.
 - 7.3.6 Only one mast is allowed to be used at any one regatta subject to replacement if damaged.
 - 7.3.7 The base of the mast shall be stepped at least 18 inches below the sheer line.
- 7.4 **Booms**
 - 7.4.1 Booms may be of wood or metal. Metal booms shall be of standard grade marine aluminum alloy. No special light-weight alloy may be used without the written approval of the Specifications Committee. Aluminum booms shall be constructed from a section uniform throughout its length excluding reshaping of the slot for the bolt rope. It shall be constructed from a section with a minimum weight of 0.59 lbs. per lineal foot and a minimum wall thickness of 0.060 inches. Sections of lesser weight or lesser wall thickness must be approved by the Specifications Committee. If the boom is wood the section throughout its length shall be uniform.
 - 7.4.2 No crosstrees, jumper struts, or other similar devices shall be allowed for bending or stiffening the boom. Boomvangs and mainsheet block arrangements are allowed.
 - 7.4.3 Only one boom is allowed to be used at any one regatta subject to replacement if damaged.
- 7.5 **Shrouds and Forestay**
 - 7.5.1 Shrouds or side stays shall not be adjusted or disconnected while underway. Turn buckles or pin setting fittings are allowed on the shrouds and forestay.

Existing boats with adjustable shroud devices shall be rendered inoperable while underway by such means approved by the measurer.

Loose or slack shrouds are permitted providing the shroud tension is not adjusted while under way.

- 7.5.2 All boats shall be fitted with a standing forestay such that either or both sails can be lowered at any time without endangering the stability of the mast or its security in the boat.

8. SAIL PLAN AND MEASUREMENT

- 8.1 The height of the sail plan shall not exceed 20 feet 6 inches measured from the sheerline in way of the mast, and the actual point of measurement shall be marked by the lower edge of a black band painted on the mast. The height of the attachment of the forestay and the job halyard shall not exceed 14 feet above the sheerline. The height of the lower black band, above the sheerline, below which the top edge of the boom shall not be set, shall not exceed 2 feet or be less than 1 foot 8 inches.
- 8.2 Two sail plans are permitted, the standard rig of 125 sq. ft. maximum and a reduced rig of 90 sq. ft. maximum. The choice of rig is at the helmsman's discretion. The two maximum areas are to be considered as maximum for each selected rig but lesser areas are allowed for each type of rig as described below.
- 8.3 **Mainsail** - The measured area of the mainsail shall not exceed 90 sq. ft. The luff of the mainsail, (1) which shall not exceed 18 feet 6 inches shall be measured on the mast from the lower edge of the upper black band to the upper edge of the lower black band, which shall not be less than 1 foot 8 inches or more than 2 feet above the sheerline. No part of the headboard shall extend above the lower edge of the upper black band and the head-board shall not exceed 4 inches measured at right angles from the mast.
- 8.4 The measurement of the foot which shall not exceed 9 feet 8-3/4 inches shall be taken along the top of the boom from the inner edge of a black band painted on the boom to an extension of a line down the forward side of the mast groove, excluding any curvature. No part of the foot of the sail shall extend beyond the inner edge of the black band.
- 8.5 The area due to the curve of the leech shall not be included in measurement of the mainsail but the width measured at right angles to the luff at its mid point is not to exceed 6 feet 6 inches. The half height measurement shall be taken along the line of the fold (a) which is formed when the top forward corner of the headboard is placed on the bottom forward corner of the tack, with two halves of the luff coinciding and the sail smoothed out in dry condition on a flat floor, this measurement shall be taken over the full width, including roping, and any hollows in the leech are to be bridged by straight lines. Similarly a three quarter height measurement shall be taken by folding the top forward corner of the headboard on to the point formed at (a) above smoothing the sail and measuring the resulting crease which shall not exceed 3 feet 9-3/4 inches, effective for sails, made after September 15, 1965.
- 8.6 Four battens are allowed in the mainsail and these shall divide the leech into approximately equal parts. The length of the upper and lower batten pockets shall not exceed 2 feet 6 inches and the length of the other batten pockets shall not exceed 3 feet 4 inches. Mainsails which are not triangular are to be measured in accordance with Canadian Albacore Association rules for the measurement of sail area. The leech of the mainsail measured from the point where the sail leaves the mast at the head to the point where sail leaves the boom at the clew measured in a straight line, shall not exceed not 20 ft.

8.7 Small Mainsail -

8.7.1 The measured area of the small mainsail shall not exceed 63 sq. ft. Any boat with a small mainsail endorsed on her certificate shall have coloured bands placed on her mast and boom indicating a luff height of 18 ft. 6 ins. and a foot of 7 foot 2 ins. measured as in rule 8.4 and 8.5.

8.7.2 The width of the small mainsail at its half height shall be measured as in rule 8.5 and shall not exceed 5 ft. 4-1/2 ins.

8.7.3 Three battens are allowed in the small mainsail and shall divide the leech into approximately equal parts. The length of the battens shall not exceed 2 ft. 6 ins.

8.7.4 The leech of the small mainsail measured as in rule 8.6 shall not exceed 18 ft. 4 ins.

8.8 Foresail -

The measured area of the large foresail shall not exceed 35 sq. ft. and the measured area of small foresail shall not exceed 27 sq. ft.

8.9 The luff measurement (L) shall be taken between the centre of the head and tack cringle and a diagonal measurement (D) from the centre of the clew cringle to the nearest point of the luff.

$$\frac{L \times D}{2} = \text{Area of foresail}$$

The areas due to curved edges of leech and foot shall not be included in measurement. No battens or other forms of stiffening are allowed in the foresail.

8.10 The centre of the grommets shall not be more than 1" from the edge of the sailcloth.

8.11 Sail Zippers or other similar devices for the purpose of changing sail area or shape are prohibited. Cunningham adjustments are allowed.

8.12 All sails that pass measurement on and after 1st April 1965 shall have inscribed in indelible ink in the tack corner, in letters at least half an inch high the initials of the measurer and the date of measurement.

Any sail not so inscribed after this date shall be deemed to be unmeasured. All replacements or spare sails shall be measured and their measurements endorsed on the certificate. Each endorsement shall be signed and dated by the measurer. No boat shall have registered for class racing more than two mainsails, two large foresails, one small foresail, and new registration shall not be accepted at a greater rate than one mainsail, one large foresail and one small foresail every twelve months, unless the Canadian Albacore Association is satisfied it is by way of replacement of lost or damaged sails. Foresails will be marked by the measurer with the mainsail number.

8.13 The official marking is A above the assigned number which shall be displayed on the sails as shown on the official drawing.

9. MATERIAL FOR MAINSAIL AND FORESAIL

9.1 All sails shall be made of cotton, or woven synthetic fibre, minimum weight 3.8 oz. and maximum 5-3/4 ozs. U.S. Standard (36" x 28-1/2") except that one transparent panel is permitted in each main sail and each head sail, and such windows shall not exceed 2 square feet in area or be less than 6" from any edge of the sail.

9.2 Every mainsail (without battens) set on boom, with clew hauled out and taut, must be capable of being rolled from foot to headboard tightly around the boom, without cracking the finish or cloth from which the sail is made.

10. SPINNAKERS

Spinnakers are not allowed in any races sponsored or sanctioned by the Canadian Albacore Association but individual clubs or groups may use spinnakers at their discretion. They should adhere to the one-design dimensions laid down by the Canadian Albacore Association as follows: The leech and luff shall not exceed 14 feet 0 inches ± 3 inches. Half the foot shall

be 5 feet 9 inches ± 1-1/2. These measurements shall be taken under a 5 lb. tension. Girth shall be measured with the sail folded in half putting the luff and leech and the two clews together and then spread evenly and flat on the floor without tension. The measurement shall be taken from the head cringle 7 feet 0 inches down the opposite side of the sail as folded. This measurement shall be 5 feet 5 inches ± 1-1/2 inches. It shall be taken when the cloth between the head of the sail and the points of measurement and immediately below are spread out smoothly on the floor. The sail parallel to the girth measurement shall be pulled only enough to smooth out vertical wrinkles, but not enough to produce transverse wrinkles. Spinnaker pole length including fittings shall not be greater than 4 feet 6 inches. Sail cloth weight shall be not less than .75 oz. nylon. Only one spinnaker shall be allowed to each boat. Attachment of the spinnaker halyard shall be not more than 14 feet 1 inch above the sheerline.

11. SAIL MARKINGS

The Canadian Albacore Association requires standardized sail markings for uniform identification of the class in Canada. The official marking is A as per the official drawing above the number. Official Canadian numbers are assigned by the Canadian Albacore Association, however, a block of numbers may, in the discretion of the Executive Committee of the Association, be assigned to an approved builder who may assign numbers to boats produced by that builder on behalf of the Association. A boat retains its sail number (corresponding to the hull number) throughout the life of the boat. When the ownership of a boat is transferred the number of the boat and sail remains although the boat is transferred.

Sail numbers, letters and emblems shall sharply contrast in colour with the sail and shall be placed at different heights on the two sides of the sail, those on the starboard side being uppermost, to avoid confusion owing to translucency of the sail.

Existing owners are not required to change their markings or numbers except in the case where confusion might arise in the opinion of the Specifications Committee. Original R.Y.A. numbers may be retained but must be placed below the A. No numbers will be duplicated in the Canadian registry. Details of the size of numbers are shown on the official drawing.

12. BUOYANCY

12.1 Buoyancy of any type may be fitted under the foredeck, aft deck and side benches. Additional buoyancy may be carried provided that this does not extend into the clear plan opening of the cockpit, nor into the floor space. The clear plan opening of the cockpit is from the after edge of the foredeck to 3 feet forward of the outside face of the transom and between the faces of the shell athwartships above the highest point of the centreboard case. The floor space shall be taken as 1 foot 2 inches from the centreline between the shrouds to 12 inches from the centreline 3 feet forward of the outside face of the transom.

Buoyancy apparatus giving a positive buoyancy of not less than 600 lbs. which shall count in the hull weight, shall always be carried in the boat whether cruising or racing. Removable buoyancy equipment included in the hull weight, shall be stamped with the boat's number and form part of its permanent equipment which shall not be removed or replaced unless the boat is re-weighed in accordance with rule 4.1. The disposition of weighed buoyancy shall be such that the flooded boat, in full racing trim, less sails, shall remain with the gunwales clear of the water and reasonably stable, both fore and aft and laterally, when persons of minimum combined weight of 600 lbs. are standing in the boat (not immersed above the knee) between the mast and the aft end of the cockpit. This test shall be for at least 30 minutes, but the measurer shall be satisfied that the equipment can be expected to support the boat and crew for long periods. The mast shall be tested for flotation. (Rule 7.1.5).

12.2 The measurer shall satisfy himself that the boat is equipped with effective buoyancy as required by these rules and that any inflatable buoyancy bags are in sound condition. He shall also

confirm that the attachment and stowage of other than built-in buoyancy is effective.

- 12.3 It is the duty of the owner to see that the buoyancy at all times complies with rule 12.1. The Certificate of Registration is valid for twelve months from the date of the original buoyancy test, or the annual retest, provided that the certificate is suitably endorsed with the date of the buoyancy test and signed by an appointed buoyancy tester. A sailing committee may at any time order a buoyancy test, the result of which shall be endorsed on the certificate of registration.
- 12.4 Hulls of fibreglass construction must have at least 6 cu. ft. of permanent buoyancy in the form of rigid foam properly secured to the boat as part of the 600 lbs. of positive buoyancy to prevent sinking of the boat if one or all air tanks are punctured and/or flooded. After January 1st, 1970 fibreglass boats built shall have buoyancy in at least 3 units of tanks moulded to the shell. Such tanks shall be permanently fitted with reserve buoyancy units in solid foam form giving each tank at least 125 lbs. of positive buoyancy. The builders shall submit for approval their proposals for the distribution of the required buoyancy to the Specifications Committee before production is commenced on that specific model.
- 12.5 By January 1st, 1970 all existing fibreglass boats shall have at least 6 cubic feet of permanent buoyancy as part of the 600 lb. of positive buoyancy. Such permanent buoyancy shall be designed and secured in the boat to support the boat for long periods of time in the event of loss or failure of the air tanks or bags, all to the satisfaction of the measurer.
- 12.6 All boats with rigid air tanks constructed of fibreglass shall have inspection plugs or ports to check on air tightness and for draining.

13. CREW

The racing crew shall consist of two or more persons including the helmsman. In special circumstances it may be desirable for a boat to be raced single handed. Prior permission of the sailing committee must be obtained.

14. GENERAL

- 14.1 Apart from items already mentioned, all hull fittings, centreboard winches are optional.
- 14.2 There is no restriction on the finish.
- 14.3 The use is prohibited of any apparatus or contrivance outboard, or extending outboard, and attached to the hull, spars or rigging, to the person of the helmsman or crew, the purpose or effect of which is or may be to support or assist in supporting a member of the crew outboard or partially outboard.
- 14.4 The registration (sail) number on boats built after 1964 shall be carved into the keelson, the figures shall be at least 1 inch high on plywood boats. Builders of fibreglass boats must put the hull number in the boat in a manner approved by the specifications committee. All numbers with the owner's name and address shall be reported to the Canadian Albacore Association Secretary for the class registry.
- 14.5 The Executive Committee may from time to time specify that possession of a valid measurement certificate shall be a condition of entering any event sponsored by the Canadian Albacore Association. Clubs or Fleets recognized by the Canadian Albacore Association may require a valid measurement certificate as a condition of entering events sponsored by the Club or Fleet.

15. ADMINISTRATION

- 15.1 All questions of conformity with, or amendments to these rules, shall be dealt with as may be required by the Canadian Albacore Association. The Specifications Committee shall have charge of the administration of these rules and specifications including the issuance of Measurement Certificates.

- 15.2 The Specifications Committee shall be empowered to approve new builders and to withdraw approval provided that such decisions shall be ratified by the Executive Committee.
- 15.3 Amendments to these rules will be avoided as far as possible. However, amendments to these rules may be made by the Executive Committee and shall be in force pending ratification at the next subsequent general meeting of the Association.
- 15.4 Change of Ownership:
Measurement Certificates become invalid with a change in ownership. When a boat is sold, send the certificate to the Canadian Albacore Association Secretary along with the name and address of the new owner. The Secretary will forward a new certificate to the new owner.

- (a) Class insignia and numerals to be 2" wide.
- (b) Insignia to be 1 1/2" high.
- (c) Numerals to be 1 1/2" high.
- (d) KE is optional.
- (e) KE to be 8" high with 1/2" thick line.
- (f) Insignia & numbers located midway on width of sail.
- (g) Insignia on centre over the numbers.
- (h) Insignia and numbers on starboard side between two upper battens.
- (i) Insignia and numbers on port side between two middle battens.
- (j) KE located close to leech of sail on both sides.
- (k) Colour of numbers and letters must be of sharp contrast to sail.

OFFICIAL LAYOUT OF SAIL
INSIGNIA & NUMBERS

15.5 An official measurer is appointed by the Specifications Committee in each area. The owner must apply to the measurer, make an appointment and prepare by having black bands painted on the mast and boom according to the class rules prior to measurement. He must present a cheque for five dollars (\$5.00) payable to the Canadian Albacore Association. The measurer sends this along with the completed measurement form to the Secretary Treasurer who will issue the certificate to the owner. The measurer is entitled to be reimbursed four dollars. (\$4.00) for measuring a boat and sails by the Canadian Albacore Association and in addition may charge the owner one dollar for either an annual buoyancy test or measurement of new sails. He must send a record of his endorsement on the certificate of new sails to the Association.

The dimensions shown are as a guide only, Rule 8 shall govern.

The finest sails are Taylor made

Tom Taylor has been giving Canadian sailors the best in sails and service since 1927: manufacturing, recutting and mending. From the smallest to the largest sailboats in Canada. So if you need a Tall Boy, a True Cut Genoa or a Star-Cut Spinnaker, Tom Taylor has it. And we guarantee the quality and hand craftsmanship of all our sails. You know you'll get the best.

We have a full line of brand-name marine hardware and boating accessories. Send for our complete catalogue: one year, \$2, three years, \$5.

For anything to do with sailing or yachting, see Tom Taylor first.

INTRODUCE A NEW MEMBER

1973 APPLICATION FOR MEMBERSHIP IN CANADIAN ALBACORE ASSOCIATION

TO: Canadian Albacore Association
193 High Park Ave.
Toronto, Ontario M6P 2S3

FROM:

Name:

Home residence address:

Summer residence address if any:

Club affiliation:

New Member Associate Renewal Fleet

Sail number: Year purchased:

Manufacturer: Model Year:

From whom purchased:

Enclose cheque for \$7.00 payable to Canadian Albacore Association

Do **NOT** send a cheque for \$7.00 with this application if you have purchased a new boat from a manufacturer or dealer in 1973, as membership is complimentary for this year.

Renewal Membership - \$7.00 New Membership - \$7.00
Associate Membership (non boat owners) - \$3.50
Fleet Membership up to 5 boats - \$7.00 6 and over - \$10.00

N.B. See Rule 15.4 in the Year Book, for transfer of ownership.

J. C. MERIAN

Exclusive Sail Maker

P.O. Box 601, Windsor, Ont.

Tel. 253-9443

Albacore sails made slowly and carefully of good quality materials.

Mainsail hand-roped; stainless steel luff wire in foresail with bronze jib hanks.

Bags, battens, numbers and insignia included in the price of \$130.00

ALBACORE RACING DINGHIES

We specialize in full wood construction and low weight.

One of these won the 1972 British Nationals. If you are

interested in a beautiful wooden Albacore please send for

leaflet.

ENGLAND

NOW HERE THIS !!!

FUTURE YEAR BOOKS WILL GO TO PRESS
ON MARCH 1ST OF EACH YEAR. IF YOU
WISH YOUR NEWS TO BE INCLUDED
PLEASE SEND YOUR MATERIAL INTO THE
C.A.A. OFFICE BY FEBRUARY 1ST. IT IS
OUR WISH THAT THE YEAR BOOK REACH
OUR MEMBERS EARLY IN THE SEASON IN
FUTURE. ALL AGREED??????

WE WOULD SUGGEST TO ALL FLEETS
AND DISTRICTS THAT YOU ELECT YOUR
OFFICERS AND SET YOUR FUTURE
REGATTA DATES, BY THE END OF EACH
YEAR, YOUR RESULTS YOU WILL HAVE
BY THE END OF EACH OCTOBER. LETS
MAKE AN ALL OUT EFFORT TO GET OUR
BOOK OUT EARLY IN THE MONTH OF
MAY....THANK YOU AND HAPPY
SAILING.

Olive Erskine

Editor

P.S. KINDLY ADVISE US OF "ANY SLIPS
THAT PASS IN THE TYPE"
